

Dexamethasone Tablets

Type of Posting	Revision Bulletin
Posting Date	2-Nov-2021
Official Date	3-Nov-2021
Expert Committee	Small Molecules 5

In accordance with the Rules and Procedures of the Council of Experts, the Small Molecules 5 Expert Committee has revised the Dexamethasone Tablets monograph. The purpose of this revision is to add *Dissolution Test 2* to accommodate FDA-approved drug products with different dissolution conditions and/or tolerances than the existing dissolution test(s). Additionally, minor editorial changes have been made to update the monograph to current *USP* style.

- *Dissolution Test 2* was validated using the Waters brand of X-bridge C18 column. The typical retention time for dexamethasone is about 4.6 min.

The Dexamethasone Tablets Revision Bulletin supersedes the currently official monograph.
